OPEN – Sat May 3, 2025

| | |
|----------------------------------|-----------|
| The last two digits of TSX Close | 68 |
| Less # of dogs entered | <u>36</u> |
| Starting Dog = | 32 |

OPEN – Sun May 4, 2025

| | |
|----------------------------------|-----------|
| The last two digits of TSX Close | 68 |
| Less # of dogs entered | <u>34</u> |
| Starting Dog = | 34 |

6.6.3 In a stake carrying championship points the starting dog in the first series will be determined by using the last two digits at closing of the Toronto Stock Exchange (TSE) S&P/TSX composite index two days prior to the first day of the trial, or if the TSX is closed that day, the first day prior to that when the TSX is open,

Strating Dog Number – Calculation & Supporting Documents

(a) The starting dog will be the dog assigned the number in the draw that corresponds to the last two digits (including digits, if any to the right of the decimal point) of the closing S&P/TSX composite index (the TSX number) two days prior to the first day of the trial, or if the TSX is closed that day, the first day prior to that when the TSX is open.

(b) If the TSX number is 00, the dog given number 1 in the draw shall be the starting dog for the first series.

(c) If the TSX number is greater than the number of dogs entered in the stake, the number of dogs entered in the stake will be subtracted from the TSX number and the resulting number (the Second TSX number) will determine the starting dog for the first series. The starting dog will be the dog assigned that Second TSX number in the draw.

(d) If the Second TSX number is still greater than the number of dogs entered in the stake the number of dogs entered in the stake will be subtracted from the Second TSX number. This subtraction process will be repeated as many times as is necessary until the number resulting from this subtraction corresponds with a number given in the draw to an entered dog. That dog will start the first series.
